## ETHICS & ACCOUNTABILITY

**30<sup>th</sup> November - 4<sup>th</sup> December 2009**  
**Uni Management Training Centre, Turin**

Is there a conflict between ethical means and ethical results? How do regulations and institutions affect personal accountability? Do an individual's personal ethics have a real impact on the effectiveness of the UN?

Ethics, Accountability and Leadership are all closely related. UN Leaders are constantly confronted with ethical choices in their work. As scrutiny over ethics and accountability increases globally, the UN has a duty to consider the issue at every level of the organization.

The upcoming edition of the UN Leaders Programme will examine these and other issues relating to ethics and leadership, within the framework of the UN and its mandate. Participants will evaluate strategic leadership situations, whilst exploring ethics and accountability through case studies, experiences and one-to-one discussions.
